## Directors' Report to the Shareholders

We are pleased to present the results of RAKBANK ("the Bank") and its subsidiaries (collectively known as "the Group") for the year ended 31 December 2015. Net profit for the year amounted to AED 1,405.3 million, a marginal decrease of AED 49.3 million over the previous year, continuing the Group's leadership position in the UAE in terms of Return on Average Assets of 3.7% and Return on Average Equity of 19.3%. Total assets stood at AED 40.6 billion, increasing by 16.4% compared to 31 December 2014. Gross loans and advances closed at AED 28.5 billion, up by 10.6% over the previous year.

#### **Financial Performance**

The decrease of AED 49.3 million in the 2015 net profit over that of 2014 was mainly due to an increase of AED 460.1 million in provision for impairment in loans and a decrease of AED 12.6 million in investment income. The total operating income increased by 10.8% whilst the operating expenses decreased by AED 26.7 million, down by 1.8% over the previous year. The operating expenses were lower mainly due to a decline in outsourced staff costs, marketing expenses and depreciation costs. Operating profit before impairment losses grew by AED 410.8 million, up by 20% over 2014. This was offset by an increase of AED 460.1 million in provisions for loan impairment, up by 77.3% from the previous year, as a result of larger payment defaults in the unsecured loan products, SME and Commercial Banking segments.

The growth in Total Operating Income by AED 384.1 million to AED 3.9 billion was mainly due to an increase of AED 291.1 million in Net Interest Income and Income from Islamic finance net of distribution to depositors compared to the previous year. Net Interest Income and income from Islamic financing increased to AED 3.0 billion. Interest income from conventional loans and investments increased by 4.2% over the last year, while interest costs on conventional deposits and borrowings increased by 8.1%. Net income from Sharia-compliant financing was up by AED 191.4 million which was in line with the increase in Islamic Financing portfolio.

Non-interest income grew by AED 93 million to AED 890.9 million, on the back of AED 37.5 million in income from the insurance segment since acquisition of Ras Al Khaimah National Insurance Company PSC (RAK Insurance) in May 2015. There was an increase of AED 30.7 million in other operating income, AED 29.3 million in net fees and commission income compared to 2014. Foreign exchange and derivative income was up by AED 8.1 million and investment income decreased by AED 12.6 million over the previous year. The decrease in investment income was due to an impairment charge for the decline in value of the equity investments portfolio compared to a gain in the previous year.

Operating costs were down by AED 26.7 million, a decrease of 1.8% over 2014. This was mainly due to a decrease of AED 10.5 million in outsourced staff costs and AED 2.8 million in marketing costs. There was a drop of AED 6.8 million in depreciation costs. Combined with an increase in Total Operating Income, the Group's cost to revenue ratio came down to 37.5% compared to 42.3% for the previous year.

#### Directors' Report to the Shareholders (continued)

Non-performing loans and advances to gross loans and advances ratio closed at 3.2% compared to 2.4% and net credit losses to average loans and advances closed at 3.8% compared to 2.5% in the previous year. The Group is well provisioned against loan losses with a conservative loan loss coverage ratio of 81.4% compared to 87.1% at the end of 2014 and this coverage ratio does not take into consideration mortgaged properties and other realizable asset collateral available against the loans. Additionally, the Bank has a non-distributable regulatory credit risk reserve equal to 1.5% of its credit risk rated assets, which amounts to AED 377 million. Together with this reserve, the provision coverage ratio would increase to 122.7%.

Total assets increased by 16.4% to AED 40.6 billion compared to the end of 2014 with the major contributions coming from gross loans and advances and lending to banks which grew by AED 2.7 billion and AED 1.6 billion respectively. The Wholesale Banking segment lending, grew by 138.1% up by AED 1.4 billion over the previous year. Retail banking segment loan portfolio which includes small and medium business loans grew by AED 1.3 billion compared 31 December 2014. Our 'Amal' Islamic Banking unit continues to grow, achieving an increase of AED 1.1 billion in its financing portfolio, up by 33.2% over the last year.

Customer deposits grew by AED 12.9% to AED 27.8 billion compared to 2014. The growth came mainly from an increase of AED 2.5 billion in demand deposits and AED 653.2 million in time deposits. Islamic customer deposits grew by AED 899.2 million to AED 3.5 billion compared to the previous year.

During the first half of 2015, the Group successfully issued the second tranche of USD 300 million notes under its USD 1 billion medium term note program at a premium rate of 100.875% through its subsidiary RAKFunding Cayman Ltd, to take advantage of the low-cost financing opportunities in the bond market and to proactively tackle the duration mismatch from funding longer tenure loans using short-term deposits. So far the Group has issued USD 800 million of these notes against the original programme of USD 1 billion. These notes mature in 2019 and carry a fixed interest rate of 3.25% per annum. Interest on these medium term notes is payable half-yearly in arrears.

In the Ordinary General Assembly on 18 August 2014, the shareholders of the Bank had approved the acquisition of a majority stake in RAK Insurance at a cash price of AED 3.64 per share. The Bank received approval on 6 January 2015 from the Central Bank of UAE to proceed with the share purchase offer to the shareholders of RAK Insurance. In May 2015 the Bank made a public offer to shareholders of the insurance company to purchase their shareholding at a cash price of AED 3.64 per share. 79.23% of RAK Insurance shareholders accepted this offer and on 28 May 2015 the Bank acquired 79.23% stake in the company which has been accounted for as a subsidiary since then.

#### Directors' Report to the Shareholders (continued)

The Bank's Tier 1 ratio as per Basel II after taking into consideration the profit for 2015 and the proposed dividend was 24.4% at yearend (subject to shareholders and UAE Central Bank approval), compared to 26.5% at the end of 2014, against a requirement of 12% set by the UAE Central Bank. We find that this level of capital provides the Bank with ample room for growth in 2016. The regulatory eligible liquid asset ratio at the end of the year was 19.1%, compared to 20.0% at the end of 2014, and advances to stable resources ratio stood comfortably at 83.3% compared to 87.9% at the end of 2014.

#### Ratings

The Bank is currently rated by the following leading rating agencies. The ratings are given below:

Rating Agency	Last Update	Deposits	Outlook
Moody's	September 2015	Baa1 / P-2	Stable
Fitch	August 2015	BBB+ / F2	Stable
Capital Intelligence	August 2015	A- / A2	Stable

#### Dividend and appropriation of profits

The Directors, at the board meeting held on 2 February 2016 have recommended a cash dividend of 50%. The Directors consider that the Bank is well placed to meet the continuing challenges which will be faced during 2016. The dividend recommendations will result in 40% of net profit being retained within the Bank's shareholders equity thereby increasing capital and reserves to strengthen the Bank's overall position and provide support for future growth.

The Directors propose to increase the general banking risk reserve by AED 100 million, credit risk reserve by AED 100 million and regulatory credit risk reserve by AED 43 million to align it at 1.5% of the Bank's total credit risk weighted assets. These measures will increase the Bank's shareholders' equity to AED 6.8 billion after payment of the proposed cash dividend. A detailed appropriation schedule is provided in note 14 to the financial statements.

#### Directors' Report to the Shareholders (continued)

#### Developments in 2015:

- Raising an additional USD 300 million bond through its EMTN
- <sup>o</sup> Appointing a new Chairman, H.E. Mohammad Omran Alshamsi
- Acquiring 79.23% stake in RAK Insurance
- Selectively re-entering the Wholesale Banking segment to diversify the Bank's risk profile
- Launching RAKelite premium banking
- Achieving the ISO 9001:2015 version certificate for the Bank's Branches and Inbound Contact Centre, certified by QCS Management Pvt Ltd of ISO 9001:2015 Quality Management System
- Introducing RAKMoneyTransfer's new remittance business with corridors to India
- Launching three new MasterCard Credit Cards including RAKBANK World, Red 'Tap & Go', and Kalyan Jewellers
- Introducing a new logo and refreshed corporate branding

#### Recognition in 2015:

- Best SME Bank in the Middle East for RAKFinance at The Asian Banker Middle East Retail Product Awards
- Best Mobile Banking Initiative for MobileCash at The Asian Banker Middle East Retail Product Awards
- Best Service Innovation for Customer Web-Chat by Ethos UAE Service Olympian Awards
- Best Mobile App by Ethos UAE Service Olympian Awards
- Best Segment Solution for World MasterCard Credit Card by MasterCard Innovation Forum
- EMEA Customer Innovation Award by Genesys G-Force Awards

#### Outlook for 2016

Looking to the future, we remain committed to generating solid and sustainable growth across our Retail, Wholesale, Treasury and Insurance segments. We are placing greater emphasis on optimizing synergies within the Group to increase efficiency while supporting the diversification of our revenue streams. By doing so, we aim to better serve our customers by offering them a seamless experience across the Bank's diverse products and services through industry-leading customer service, innovation, and simplicity. We will also continue to strengthen our capacity to meet any future challenges.

H.E. Mohamed Omran Alshamsi

For and on behalf of Board of Directors

## Independent auditor's report to the shareholders of The National Bank of Ras Al-Khaimah (P.S.C.)

#### Report on the consolidated financial statements

We have audited the accompanying consolidated financial statements of The National Bank of Ras Al-Khaimah (P.S.C.) ("the Bank") and its subsidiaries (together referred to as "Group"), which comprise the consolidated statements of financial position as of 31 December 2015 and the consolidated statement of income, comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

#### Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards and their preparation in compliance with the applicable provisions of the UAE Federal Law No. (2) of 2015, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

### Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### Independent auditors' report to the shareholders of The National Bank of Ras Al-Khaimah (P.S.C.) (continued)

#### **Opinion**

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as at 31 December 2015 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

#### Report on other legal and regulatory requirements

As required by the UAE Federal Law No. (2) of 2015, we report that:

- i) we have obtained all the information we considered necessary for the purposes of our audit;
- ii) the consolidated financial statements have been prepared and comply, in all material respects, with the applicable provisions of the UAE Federal Law No. (2) of 2015;
- iii) the Group has maintained proper books of account;
- iv) the financial information included in the Chairman's and Directors' report is consistent with the books of account of the Group;
- v) as disclosed in note 7 to the consolidated financial statements, the Group has purchased / invested in shares during the year ended 31 December 2015;
- vi) note 34 to the consolidated financial statements discloses material related party transactions, and the terms under which they were conducted;
- vii) based on the information that has been made available to us nothing has come to our attention which causes us to believe that the Group has contravened during the year ended 31 December 2015 any of the applicable provisions of the UAE Federal Law No. (2) of 2015 or in respect of the Bank, its Articles of Association which would materially affect its activities or its financial position as at 31 December 2015; and
- viii) note 44 to the consolidated financial statements discloses the social contributions made during the year ended 31 December 2015.

Further, as required by the UAE Union Law No (10) of 1980, as amended, we report that we have obtained all the information and explanations we considered necessary for the purpose of our audit.

## Notes to the consolidated financial statements for the year ended 31 December 2015

## 1 Incorporation and principal activities

The National Bank of Ras Al-Khaimah ("the Bank") is a public shareholding company incorporated in the Emirate of Ras Al-Khaimah in the United Arab Emirates ("UAE") in accordance with the UAE Federal law No. 8 of 1984 (as amended) and listed on the Abu Dhabi Securities Exchange. The head office of the Bank is located at the National Bank of Ras Al-Khaimah building, Al Rifa area, Exit No. 129, Sheikh Mohammed Bin Zayed road, Ras Al-Khaimah, UAE.

UAE Federal Law No. 2 of 2015 (Companies Law) which is applicable to the Group has come into effect from 1 July 2015. The Group is currently assessing and evaluating the relevant provisions of the Companies Law. It has twelve months from the effective date of the Companies Law to fully comply with the Companies Law under the transitional provisions set out therein.

The Bank is engaged in providing retail and commercial banking services through a network of thirty five branches in the UAE.

In the Ordinary General Assembly on 18 August 2014, the shareholders of the Bank approved the acquisition of a majority stake in Ras Al Khaimah National Insurance Company PSC (RAKNIC) at a cash price of AED 3.64 per share. The Bank received approval on 6 January 2015 from the Central Bank of UAE to proceed with the share purchase offer to the shareholders of RAKNIC. In May 2015 the Bank made a public offer to shareholders of RAKNIC to purchase their shareholding at a cash price of AED 3.64 per share. 79.23% of RAKNIC shareholders accepted this offer and on 28 May 2015 the Bank acquired 79.23% stake in RAKNIC, which has been accounted for as a subsidiary from that date — see note 40 for details of the business combination. Accordingly, the consolidated results include the results of RAKNIC from the date of acquisition to 31 December 2015 and include the assets less liabilities of RAKNIC on 31 December 2015.

At 31 December 2015, The National Bank of Ras Al-Khaimah (P.S.C) comprises the Bank and five subsidiaries (together referred to as "the Group"). The consolidated financial statements for the year ended 31 December 2015 comprises the Bank and its subsidiaries.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 1 Incorporation and principal activities (continued)

Subsidiary	Authorised and issued capital	Ownership interest	Incorporated	Principal Activities
Ras Al Khaimah National Insurance Company PSC	AED 110 Million	79.23%	UAE	All type of insurance business.
RAK Islamic Finance Company Pvt. J.S.C	AED 100 million	99.9%	UAE	To sell sharia compliant financial products
BOSS FZCO	AED 500,000	80%	UAE	Back office support services to the Bank
RAK Technologies FZCO	AED 500,000	80%	UAE	Technological support services to the Bank
Rakfunding Cayman Limited	USD 100	99.9%	Cayman Island	To facilitate the issue of USD 800 million Euro medium term notes (EMTN) under the Bank's USD 1 billion EMTN programme.

## 2 Significant accounting policies

The significant accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

#### (a) Basis of preparation

The consolidated financial statements have been prepared on a going concern basis in accordance with International Financial Reporting Standards ("IFRS") and IFRS Interpretation Committee (IFRS IC) interpretations applicable to the companies reporting under IFRS. The consolidated financial statements are prepared under the historical cost convention except for held for trading and available-for-sale financial assets and derivative financial instruments which have been measured at fair value.

The preparation of consolidated financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 43.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

- 2 Significant accounting policies (continued)
- (a) Basis of preparation (continued)

#### Standards, amendments and interpretations

Standards, amendments and interpretations that are effective for the Group's accounting period beginning on 1 January 2015

New standards and significant amendments to standards applicable	Effective date
to the Group	Effective date
Annual improvements 2010-2012 cycle  IFRS 8, 'Operating segments' which is amended to require disclosure of the judgements made by management in applying the aggregation criteria to operating segments. It is also amended to require a reconciliation of segment assets to the entity's assets when segment assets are reported. IAS 16, 'Property, plant and equipment' and IAS 38, 'Intangible assets' are amended to clarify how the gross carrying amount and the accumulated depreciation are treated where an entity uses the revaluation model.	1 July 2014
■ IAS 24, 'Related party disclosures' is amended to include, as a related party, an entity that provides key management personnel services to the reporting entity or to the parent of the reporting entity (the 'management entity'). Disclosure of the amounts charged to the reporting entity is required.  ■ IFRS 3 – clarifies that an obligation to pay contingent consideration is classified as financial liability or equity under the principles in IAS 32 and that all non-equity contingent consideration (financial and non-financial) is measured at fair value at each reporting date.	
Annual improvements 2011- 2013  IFRS 13 'Fair value measurement' on clarification of the portfolio exemption in IFRS 13 - The amendment clarifies that the portfolio exception in IFRS 13, which allows an entity to measure the fair value of a group of financial assets and financial liabilities on a net basis, applies to all contracts (including non-financial contracts) within the scope of IAS 39, 'Financial instruments: Recognition and measurement' or IFRS 9, 'Financial instruments.'  IFRS 3 - clarifies that an obligation to pay contingent consideration is classified as financial liability or equity under the principles in IAS 32 and that all non-equity contingent consideration (financial and non-financial) is measured at fair value at each reporting date.	1 July 2014
IAS 19, Defined benefit plans: Employee contributions  The amendment clarifies the accounting by entities with plans that require contributions linked only to service in each period.  Entities with plans that require contributions that vary with service will be required to recognise the benefit of those contributions over employees' working lives. Management should consider how it will apply that model.	1 July 2014

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

## 2 Significant accounting policies (continued)

(a) Basis of preparation (continued)

### Standards, amendments and interpretations (continued)

There is no material impact of the above amendments on the consolidated financial statements of the Group.

There are no other IFRSs or IFRIC interpretations that were effective for the first time for the financial year beginning on 01 January 2015 that have had a material impact on the Group's consolidated financial statements.

Standards, amendments and interpretations issued but not yet effective for the Group's accounting period beginning on 1 January 2015 and not early adopted

Amendment to IAS 16, 'Property, plant and equipment' and IAS 38, 'Intangible assets' regarding depreciation and amortisation.  This amendment clarifies that revenue is generally presumed to be an inappropriate basis for measuring the consumption of the economic benefits embodied in an intangible asset. The presumption may only be rebutted in certain limited circumstances.	
IAS 1 Amendments to IAS 1, 'Presentation of financial statements' Disclosure initiative  The amendments clarify that it may be necessary to disaggregate some of the line items specified in IAS 1 paragraphs 54 (statement of financial position) and 82 (profit or loss). That disaggregation is required where it is relevant to an understanding of the entity's financial position or performance.	1 January 2016
Amendments to IFRS 10, 'Consolidated financial statements' and IAS 28, 'Investments in associates and joint ventures' regarding the sale or contribution of assets between an investor and its associate or joint venture  These amendments address an inconsistency between IFRS 10 and IAS 28 in the sale or contribution of assets between an investor and its associate or joint venture. A full gain or loss is recognised when a transaction involves a business. A partial gain or loss is recognised when a transaction involves assets that do not constitute a business, even if those assets are in a subsidiary.	1 January 2016
The IASB has made amendments to IAS 27 Separate Financial Statements which will allow entities to use the equity method in their separate financial statements to measure investments in subsidiaries, joint ventures and associates.  IAS 27 currently allows entities to measure their investments in subsidiaries, joint ventures and associates either at cost or as a financial asset in their separate financial statements. The amendments introduce the equity method as a third option. The election can be made independently for each category of investment (subsidiaries, joint ventures and associates). Entities wishing to change to the equity method must do so retrospectively.	

## Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

- 2 Significant accounting policies (continued)
- (a) Basis of preparation (continued)

Standards, amendments and interpretations (continued)

#### Annual improvements 2012-2014 cycle 1 January 2016 ■ IFRS 7, 'Financial instruments: Disclosures' – The amendment related to servicing contracts requires that if an entity transfers a financial asset to a third party under conditions which allow the transferor to derecognise the asset, IFRS 7 requires disclosure of all types of continuing involvement that the entity might still have in the transferred assets. ■ IAS 19, 'Employee benefits' – The amendment clarifies, when determining the discount rate for post-employment benefit obligations, that it is the currency that the liabilities are denominated in that is important. not the country where they arise. ■ IAS 34, 'Interim financial reporting', regarding information disclosed elsewhere in the interim financial report. The amendment clarifies what is meant by the reference in the standard to 'information disclosed elsewhere in the interim financial report'. The amendment further amends IAS 34 to require a cross-reference from the interim financial statements to the location of that information. The amendment is retrospective. IFRS 15, 'Revenue from contracts with customers' 1 Jánuary 2018 This standard replaces IAS 11, 'Construction contracts', IAS 18, 'Revenue' and related interpretations. Revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use of and obtain the benefits from the good or service. The core principle of IFRS 15 is that an entity recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. IFRS 15 also includes a cohesive set of disclosure requirements that will result in an entity providing users of financial statements with comprehensive information about the nature. amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts with customers.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

- 2 Significant accounting policies (continued)
- (a) Basis of preparation (continued)

Standards, amendments and interpretations (continued)

#### IFRS 9, 'Financial instruments'

The complete version of IFRS 9 replaces most of the guidance in IAS 39. IFRS 9 retains but simplifies the mixed measurement model and establishes three primary measurement categories for financial assets: amortised cost, fair value through OCI and fair value through P&L. The basis of classification depends on the entity's business model and the contractual cash flow characteristics of the financial asset. Investments in equity instruments are required to be measured at fair value through profit or loss with the irrevocable option at inception to present changes in fair value in OCI. There is now a new expected credit losses model that replaces the incurred loss impairment model used in IAS 39. For financial liabilities, there were no changes to classification and measurement except for the recognition of changes in own credit risk in other comprehensive income, for liabilities designated at fair value, through profit or loss. IFRS 9 relaxes the requirements for hedge effectiveness by replacing the bright line hedge effectiveness tests. It requires an economic relationship between the hedged item and hedging instrument and for the 'hedged ratio' to be the same as the one management actually uses for risk management purposes. Contemporaneous documentation is still required but is different to that currently prepared under IAS 39.

1 January 2018
Earlier
application is
permitted. If an
entity elects to
early apply, it
must apply all
of the
requirements at
the same time.

The Group has plans in place for adhering to the above new standards and amendments to published standards or IFRIC interpretations. IFRS 9 in particular is expected to have a pervasive impact on the Group's financial statements and the Group will commence evaluating the potential effects during the first half of the 2016.

There are no other applicable new standards and amendments to published standards or IFRIC interpretations that have been issued but are not effective for the first time for the Group's financial year beginning on 1 January 2015 that would be expected to have a material impact on the consolidated financial statements of the Group.

#### (b) Consolidation

The consolidated financial statements incorporate the consolidated financial statements of The National Bank of Ras Al-Khaimah (P.S.C.) and its subsidiaries (collectively referred to as "Group").

#### **Subsidiaries**

Subsidiaries are all entities over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 2 Significant accounting policies (continued)

#### (b) Consolidation (continued)

Transactions eliminated on consolidation

Intra-group balances and income and expenses (except for foreign currency transaction gains or losses) arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

#### (c) Loans and advances and provision for impairment

Loans and advances are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and advances are initially recognized at fair value, which is the cash consideration to originate or purchase a loan including any transaction costs, and measured subsequently at amortised cost using the effective interest method.

The Group assesses at each financial position date whether there is objective evidence that loans and advances are impaired. Loans and advances are impaired and impairment losses are incurred only if there is objective evidence that the Group will not be able to collect all amounts due.

The criteria that the Group uses to determine that there is objective evidence of an impairment loss include:

- Delinquency in contractual payments of principal or interest;
- Cash flow difficulties experienced by the borrower;
- Breach of loan covenants or conditions:
- Initiation of bankruptcy proceedings;
- Deterioration of the borrower's competitive position;
- Deterioration in the value of collateral; and
- Observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the portfolio, including:
- (i) adverse changes in the payment status of borrowers in the portfolio; and
- (ii) national or local economic conditions that correlate with defaults on the assets in the portfolio.

## Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 2 Significant accounting policies (continued)

#### (c) Loans and advances and provision for impairment (continued)

The Group first assesses whether objective evidence of impairment exists either individually for financial assets that are individually significant and individually or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the consolidated income statement. If the amount of impairment subsequently decreases due to an event occurring after the write down, the release of the provision is credited to the consolidated income statement. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics (i.e. on the basis of the Group's grading process that considers asset type, industry, collateral type, past-due status and other relevant factors). Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets and historical loss experience for assets with similar credit risk characteristics. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not currently exist.

Estimates of changes in future cash flows for groups of assets reflect and are directionally consistent with changes in related observable data from period to period (for example, changes in unemployment rates, property prices, payment status, or other factors indicative of changes in the probability of losses and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly by the Group to reduce any differences between loss estimates and actual loss experience.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 2 Significant accounting policies (continued)

#### (c) Loans and advances and provision for impairment (continued)

When a loan is uncollectable, it is written off against the related provision for impairment. This is normally done within six to twelve months of the loan becoming past due, depending on type of the loan. Non performing mortgage loans, however, are written off after considering each individual case. If no related provision exists, it is written off to the consolidated income statement. Subsequent recoveries are credited to the consolidated income statement.

Loans that are either subject to collective impairment assessment or individually significant and whose terms have been renegotiated are no longer considered to be past due but are treated as new loans.

#### (d) Islamic financing

The Group engages in Shari'ah compliant Islamic banking activities through various Islamic instruments such as Murabaha, Salam, Mudaraba, and Wakala. The accounting policy for initial recognition, subsequent measurement and derecognition of Islamic financial assets and liabilities are as per Note 2(c).

### (i) Murabaha financing

A sale contract whereby the Group sells to a customer commodities and other assets at an agreed upon profit mark up on cost. The Group purchases the assets based on a promise received from customer to buy the item purchased according to specific terms and conditions. Profit from Murabaha is quantifiable at the commencement of the transaction. Such income is recognised as it accrues over the period of the contract on effective profit rate method on the balance outstanding.

#### (ii) Salam

Bai Al Salam is a Sale contract where the Customer (Seller) undertakes to deliver/supply a specified tangible asset to the Group (Buyer) at mutually agreed future date(s) in exchange for an advance price fully paid on the spot by the buyer.

Revenue on Salam financing is recognised on the effective profit rate basis over the period of the contract, based on the Salam capital outstanding.

#### (iii) Mudaraba

A contract between the Group and a customer, whereby one party provides the funds (Rab Al Mal- customer) and the other party (the Mudarib- the Group) invests the funds in a project or a particular activity and any profits generated are distributed between the parties according to the profit shares that were pre-agreed in the contract. The Mudarib would bear the loss in case of default, negligence or violation of any of the terms and conditions of the Mudaraba, otherwise, losses are borne by the Rab Al Mal.

## Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 2. Significant accounting policies (continued)

- (d) Islamic financing (continued)
- (iv) Wakala

An agreement between the Group and customer whereby one party (Rab Al Mal-principal) provides a certain sum of money to an agent (Wakil), who invests it according to specific conditions in return for a certain fee (a lump sum of money or a percentage of the amount invested). The agent is obliged to return the invested amount in case of default, negligence or violation of any of the terms and conditions of the Wakala. The Group may be Wakil or Rab Al Mal depending on the nature of the transaction.

Estimated income from Wakala is recognised on an accrual basis over the period, adjusted by actual income when received. Losses are accounted for on the date of declaration by the agent.

#### (v) Ijara

Ijara financing is a finance lease agreement whereby the Bank (lessor) leases an asset based on the customer's (lessee) request and promise to lease the assets for a specific period in lieu of rental instalments. Ijara ends in transferring the ownership of the asset to the lessee at the end of the lease inclusive of the risks and rewards incident to an ownership of the leased assets. Ijara assets are stated at amounts equal to the net investment outstanding in the lease including the income earned thereon less impairment provisions.

#### (e) Investment securities

The Group classifies its investment securities in the following categories: Trading securities, Held-to-maturity and available-for-sale. Management determines the classification of its investments at initial recognition.

Trading securities: Investment securities held at fair value through profit and loss are those which are acquired principally for the purpose of trading with the objective of generating profit.

Held-to-maturity: Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity. If the Group were to sell other than an insignificant amount of held-to-maturity assets, the entire category would be reclassified as available for sale except if sale is due to significant deterioration of the issuer.

## Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 2 Significant accounting policies (continued)

#### (e) Investment securities (continued)

Available-for-sale: Available-for-sale investments are those non-derivative financial assets that are designated as available-for-sale or are not classified as (a) loans and advances, (b) held-to-maturity investments.

Regular purchases and sales of financial assets at held to maturity and available for sale are recognised on settlement date.

Financial assets, except assets that are held for trading, are initially recognised at fair value plus transaction costs. For financial assets acquired for trading, transaction costs are charged to profit and loss. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or where the Group has transferred substantially all risks and rewards of ownership.

Available-for-sale financial assets are subsequently carried at fair value. Held-to-maturity investments are carried at amortised cost using the effective interest method.

Gains and losses arising from changes in the fair value of available-for-sale financial assets are recognised directly in consolidated statement of comprehensive income, until the financial asset is derecognised or impaired. At this time, the cumulative gain or loss previously recognised through the consolidated statement of comprehensive income is recognised in the income statement.

Foreign currency gains and losses arising on available-for-sale monetary financial assets are directly recognised in the consolidated income statement.

The fair values of quoted investments in active markets are based on current bid prices, as the Group considers the bid prices to be most representative of fair value, if the market for a financial asset is not active (and for unlisted securities), the Group establishes fair value by using valuation techniques.

Interest earned whilst holding investment securities is reported as interest income in the consolidated income statement.

Dividends on available-for-sale equity instruments are recognised in the consolidated income statement when the Group's right to receive payment is established.

The Group assesses at each financial position date whether there is objective evidence that a financial asset is impaired. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is considered in determining whether the asset is impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss – is removed from equity and recognised in the income statement. Impairment losses recognised in the income statement on available-for-sale equity instruments are not reversed through the income statement, but through other comprehensive income. Impairment on debt securities classified as available-for-sale and those held to maturity is assessed as outlined in the accounting policy for impairment of loans and advances (Note 2(c)).

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

## 2 Significant accounting policies (continued)

#### (f) Due from banks

Amounts due from banks are initially recognized at fair value and measured subsequently at amortised cost using the effective interest method. Impairment of amount due from banks is assessed as outlined in the accounting policy for loans and advances (Note 2(c)).

### (g) Cash and cash equivalents

In the consolidated statement of cash flows, cash and cash equivalents include cash on hand, money in current and call accounts and placements with original maturity of less than three months excluding the statutory deposit required to be maintained with the UAE Central Bank.

#### (h) Derivative financial instruments

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at their fair value. Fair values are obtained from quoted market prices in active markets, including recent market transactions. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. All derivatives are carried as assets when fair value is positive and as liabilities when fair value is negative.

The Group documents at the inception of the transaction the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedging transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.

The fair values of various derivative instruments are disclosed in note 24.

#### Fair value hedge

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recorded in the income statement, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The Group only applies fair value hedge accounting for hedging fixed interest risk on debt securities issued. The gain or loss relating to the effective portion of interest rate swaps hedging fixed rate debt securities issued is recognised in the income statement within 'Interest expense'. The gain or loss relating to the ineffective portion is recognised in the income statement within 'Other operating income'. Changes in the fair value of the hedge fixed rate debt securities issued attributable to interest rate risk are recognised in the income statement within 'Interest expense'.

If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item for which the effective interest method is used is amortised to profit or loss over the period to maturity.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

## 2 Significant accounting policies (continued)

#### (i) Debt securities issued

Debt issued is recognised initially at fair value, net of transaction costs incurred. After initial measurement, debt issued is subsequently measured at amortised cost using the effective interest rate. Amortised cost is calculated by taking into account any discount or premium on the issue and costs that are an integral part of the effective interest rate.

#### (j) Property and equipment

Land and buildings comprise branches, offices and certain residential premises purchased for occupation of management and staff. Property and equipment is stated at cost less accumulated depreciation. Cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent expenditures are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repair and maintenance costs are charged to the income statement during the financial period in which they are incurred.

Land is not depreciated as it is deemed to have an infinite life. Depreciation on other assets is calculated using the straight-line method to write down the cost of assets to their estimated residual values over their expected useful economic lives as follows:

Buildings	15 - 30
8	10 00
Computer equipment and software	4-15
Furniture, fixtures and equipment	4 - 6
Leasehold improvements	2-6
Motor vehicles	2-4

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Capital work in progress is stated at cost and is transferred to the appropriate asset category when it is brought into use and is depreciated in accordance with the Group's accounting policy.

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount.

Gains and losses on disposal of property and equipment are determined by comparing the sales proceeds to the carrying value of the asset disposed and are taken into account in determining operating income.

Years

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 2 Significant accounting policies (continued)

- (k) Employee benefits
- (i) Defined contribution plan

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognised as an employee benefit expense in consolidated income statement in the periods during which services are rendered by employees. Pension contributions are made in respect of UAE national employees to the UAE General Pension and Social Security Authority in accordance with the UAE Federal Law No (7), 1999 for Pension and Social Security.

#### (ii) Defined benefit plan

Provision is for the end of service benefits due to non-UAE nationals in accordance with the UAE Labour Law for their periods of service up to the financial position date. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension obligation. The provision arising is disclosed as 'provision for employees' end of service benefits' in the statement of financial position.

#### (iii) Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid under short-term if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

A provision is made for the estimated liability for employees' entitlements to annual leave and leave passage as a result of services rendered by the employees up to financial position date. This provision is included in other liabilities.

#### (1) Fiduciary assets

Assets and the income arising on the Bank's fiduciary activities, where it acts in a fiduciary capacity such as nominee, trustee or agent, are excluded from these consolidated financial statements. Income earned by the Group from its fiduciary services is recognised in accordance with the accounting policy on fees and commission income (Note 2(r)).

## Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 2 Significant accounting policies (continued)

- (m) Share capital
- (i) Share issue costs

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction from the proceeds.

#### (ii) Dividends on ordinary shares

Dividends on ordinary shares are recognised in equity in the period in which they are approved by the Bank's shareholders.

#### (n) Provisions and contingent liabilities

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset only if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Contingent liabilities, which include certain guarantees and letters of credit, are possible obligations that arise from past events whose existence will be confirmed only by the occurrence, or non-occurrence, of one or more uncertain future events not wholly within the Group's control; or are present obligations that have arisen from past events but are not recognised because it is not probable that settlement will require outflow of economic benefits, or because the amount of the obligations cannot be reliably measured. Contingent liabilities are not recognised in the consolidated financial statements but are disclosed in the notes to the consolidated financial statements, unless they are remote.

#### (o) Due to customers

Due to customers are recognised initially at fair value, net of transaction costs incurred. Due to customers are subsequently carried at amortised cost using the effective interest method.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

## 2 Significant accounting policies (continued)

#### (p) Foreign currencies

Items included in the consolidated financial statements of the Group are measured using UAE Dirhams which is the currency of the primary economic environment in which the Group operates ('functional currency'). The consolidated financial statements are presented in UAE Dirhams. Foreign currency transactions are translated into the UAE Dirham at the rate ruling on the transaction date. Monetary assets and liabilities denominated in foreign currencies are translated into UAE Dirhams at the rates ruling at the consolidated statement of financial position date. Any resultant gains or losses are accounted for in the income statement other than for items presented in other comprehensive income.

#### (q) Interest income and expense

Interest income and expense are recognised in the income statement for all instruments measured at amortised cost using the effective interest method. Interest earned whilst holding investment securities is reported in interest income in the income statement.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

#### (r) Fee and commission income

Fees and commissions, other than loan arrangement fees, are generally recognised when the service has been provided. Loan commitment fees for loans that are likely to be drawn down are deferred and recognised as an adjustment to the effective interest rate on the loan. Portfolio and other management advisory and service fees are recognised based on the applicable service contracts, usually on a time-proportionate basis. Fees earned on the Bank's fiduciary activities are recognised over the period in which the service is provided. The same principle is applied to custody services that are continuously provided over an extended period of time.

#### (s) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 2 Significant accounting policies (continued)

### (t) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is the person or group that allocates resources to and assesses the performance of the operating segments of an entity. All transactions between business segments are conducted on an arm's length basis, with intra-segment revenue and costs being eliminated. Income and expenses directly associated with each segment are included in determining business segment performance. In accordance with IFRS 8, the Bank has the following business segments: retail banking, business banking and treasury.

#### (u) Intangible assets

Intangible assets acquired in a business combination are measured on initial recognition at cost, which is their fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. The useful lives of intangible assets are assessed to be either finite or indefinite.

Intangible assets with finite lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of income in the expense category consistent with the function of the intangible asset.

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash generating unit level. Such intangibles are not amortised. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

#### (i) License

The license represents the right to conduct insurance operations, which is granted by the relevant insurance regulator. This license is assessed as having an indefinite useful life and included in goodwill.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

- 2 Significant accounting policies (continued)
- (u) Intangible assets (continued)
- (ii) Customer relationships

The value of customer relationships represents the value of future cash flows expected from renewals and the cross-selling of new products to customers known and identified at the time of the acquisition and will be amortised on a straight line basis over the estimated useful life which is 4 years.

#### (v) Insurance contracts

Insurance and reinsurance contracts held

The Group, through its insurance subsidiary RAKNIC, issues contracts that transfer insurance risks in the general insurance category. The general insurance category comprises Casualty, Group Life, Financial Lines, Fire, Marine, Energy and Accident and Health.

The Group writes the following types of insurance contracts:

- · Accident insurance
- · Property insurance
- · Motor insurance
- · Fire insurance
- ·Casualty insurance
- · Medical insurance
- · Marine insurance
- ·Engineering insurance
- ·Group life insurance

Provision is made for premium deficiency arising from general insurance contracts where the expected value of claims and expenses attributable to the unexpired periods of policies in force at the reporting date exceeds the unearned premiums provision and already recorded claim liabilities in relation to such policies. The provision for premium deficiency is calculated by reference to classes of business which are managed together, after taking into account the future investment return on investments held to back the unearned premiums and claims provisions.

#### Insurance and other receivables

Insurance and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less impairment losses. A provision for impairment of receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

## 2 Significant accounting policies (continued)

#### (v) Insurance contracts (continued)

Insurance and other receivables (continued)

Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the receivable is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the effective interest rate.

The carrying amount of the receivable is reduced through the use of an allowance account, and the amount of the loss is recognised in the income statement within general and administration expenses. When a receivable is uncollectible, it is written off against the allowance account for that receivable. Subsequent recoveries of amounts previously written off are credited against other operating expenses in the income statement.

#### Deferred acquisition costs

The costs attributable to the acquisition of new business for insurance contracts and renewing existing contracts are capitalised as an intangible asset under Deferred Acquisition Costs (DAC). All other costs are recognised as expenses when incurred. DAC are subsequently amortised over the life of the contracts as premium is earned.

Deferred acquisition costs are reviewed by category of business at the end of each reporting period and are written off where they are no longer considered to be recoverable.

#### i) Classification

The Group issues contracts that transfer either insurance risk or both insurance and financial risks.

Contracts under which the Company accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder are classified as insurance contracts. Insurance risk is significant if an insured event could cause the Company to pay significant additional benefits due to happening of the insured event compared to its non happening.

Insurance contracts may also transfer some financial risk. Financial risk is the risk of a possible future change in one or more of a specified interest rate, security price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index or other variable, provided in the case of a non-financial variable that the variable is not specific to a party to the contract.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 2 Significant accounting policies (continued)

#### (v) Insurance contracts (continued)

Contracts where insurance risk is not significant are classified as investment contracts.

Once a contract is classified as an insurance contract it remains classified as an insurance contract until all rights and obligations are extinguished or expired.

#### ii) Recognition and measurement

#### **Premiums**

Gross premiums written reflect business incepted during the year, and exclude any fees and other amounts collected with and calculated based on premiums. These are recognised when underwriting process is complete and policies are issued.

The earned position of premium is recognised as an income. Premiums are earned from the date of attachment of risk over the indemnity period and unearned premium is calculated using the basis described below:

Unearned premium provision

Unearned premiums are computed using statistical models to spread premium written evenly over period of coverage and are at least equal to the minimum stipulated by the UAE Insurance Law.

#### iii) Claims

Claims outstanding comprise provisions for the Group's estimate of the ultimate cost of settling all claims incurred but unpaid at the reporting date whether reported or not, and related internal and external claims handling expense reduced by expected salvage and other recoveries. Claims outstanding are assessed by reviewing individual reported claims. Provisions for claims outstanding are not discounted. Adjustments to claims provisions established in prior periods are reflected in the financial statements of the period in which the adjustments are made. The methods used, and the estimates made, are reviewed regularly. Provision is also made for any claims incurred but not reported ("IBNR") at the date of statement of financial position on the basis of management estimates...

#### iv) Liability adequacy test

At the end of each reporting period, the Group assesses whether its recognised insurance liabilities are adequate using current estimates of future cash flows under its insurance contracts. If that assessment shows that the carrying amount of its insurance liabilities is inadequate in the light of estimated future cash flows, the entire deficiency is immediately recognised in profit or loss and an unexpired risk provision is created.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

- 2 Significant accounting policies (continued)
- (v) Insurance contracts (continued)
- iv) Liability adequacy test

Provision is made for premium deficiency arising from general insurance contracts where the expected value of claims and expenses attributable to the unexpired periods of policies in force at the reporting date exceeds the unearned premiums provision and already recorded claim liabilities in relation to such policies. The provision for premium deficiency is calculated by reference to classes of business which are managed together, after taking into account the future investment return on investments held to back the unearned premiums and claims provisions.

#### v) Reinsurance

The Group cedes reinsurance in the normal course of business for the purpose of limiting its net loss potential through the diversification of its risks. Assets, liabilities and income and expense arising from ceded reinsurance contracts are presented separately from the assets, liabilities, income and expense from the related insurance contracts because the reinsurance arrangements do not relieve the Group from its direct obligations to its policyholders.

Amounts due to and from reinsurers are accounted for in a manner consistent with the related insurance policies and in accordance with the relevant reinsurance contracts. Reinsurance premiums are deferred and expensed using the same basis as used to calculate unearned premium reserves for related insurance policies. The deferred portion of ceded reinsurance premiums is included in reinsurance assets.

Reinsurance assets are assessed for impairment at each reporting date. A reinsurance asset is deemed impaired if there is objective evidence, as a result of an event that occurred after its initial recognition, that the Group may not recover all amounts due, and that event has a reliably measurable impact on the amounts that the Group will receive from the reinsurer. Impairment losses on reinsurance assets are recognised in statement of profit or loss in the period in which they are incurred.

Profit commission in respect of reinsurance contracts is recognised on an accrual basis.

#### vi) Deferred acquisition cost

For general insurance contracts, the deferred acquisition cost asset represents the position of acquisition costs which corresponds to the proportion of gross premiums written that is unearned at the reporting date.

## Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

## 2 Significant accounting policies (continued)

- (v) Insurance contracts (continued)
- vii) Insurance receivables and payables

Amounts due from and to policyholders, agents and reinsurers are financial instruments and are included in insurance receivables and payables, and not in insurance contract provisions or reinsurance assets.

#### viii) Insurance contract provision and reinsurance assets

Insurance contract liabilities towards outstanding claims are made for all claims intimated to the Group and still unpaid at the statement of financial position date, in addition for claims incurred but not reported. The unearned premium considered in the insurance contract liabilities comprise the estimated proportion of the gross premiums written which relates to the periods of insurance subsequent to the statement of financial position date.

The reinsurers' portion towards the above outstanding claims, claims incurred but not reported and unearned premium is classified as reinsurance contract assets in the financial statements.

#### 3 Cash and balances with the UAE Central Bank

	2015 AED'000	2014 AED'000
Cash in hand	802,647	696,244
Balances with the UAE Central Bank	277,835	G-1
Statutory deposit with the UAE Central Bank	2,827,714	2,521,225
Certificates of deposit with the UAE Central Bank	1,000,000	1,000,000
	4,908,196	4,217,469

Statutory deposits maintained with the UAE Central Bank represent deposits at stipulated percentages of the Bank's demand, savings, time and other deposits. These are only available for day-to-day operations under certain specified conditions and cannot be withdrawn without the Central Bank's prior approval.

Cash in hand, balances and statutory deposit with the UAE Central Bank are non-interest bearing. Certificates of deposit carry an interest rate of 0.22% to 0.40 % (2014: 0.40%) per annum.

Interest rate swaps	22,625	12,789
Others	64,002	26,062
	424,676	317,263

Others includes AED 5.4 million real estate acquired on settlement of a loan given to a wholesale banking customer. This being a non-cash transaction, it has not been reflected in the consolidated statement of cash flows.

As per UAE Central Bank regulation, the Bank can hold the real estate assets for a maximum period of three years and can extend the holding after obtaining Central Bank approval. The Bank can also rent the property and earn rental income.

Fair valuation of the property is carried out by an independent valuer having an appropriate professional qualification and is based on recent experience in the location and category of the property being valued. The property was valued in December 2015.

#### 12 Share capital

The authorised, issued and fully paid share capital comprises 1,676.25 million shares of AED 1 each (2014: 1,676.25 million shares of AED 1 each).

At the meeting of the shareholders held on 9 April 2015, the shareholders of the Bank approved a cash dividend of 50% of issued and paid up capital amounting to AED 838.12 (2013: AED 838.12 million) for the year 2014. These dividends were paid out during the second quarter of 2015.

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

#### 13 Share premium

Share premium represents amounts received from shareholders in excess of the nominal value of the shares allotted to them. In accordance with the Articles of Association of the Bank, share premium is not available for distribution.

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

	At 1 January 2014 Changes during the year	At 31 December 2014 Changes during the year At 31 December 2015

In accordance with the UAE Federal Law No (2) of 2015, 10% of the Bank's net profit for the year is transferred to a legal reserve, until such time as the balance in the reserve equals 50% of the issued share capital. This reserve is not available for distribution. Additionally, the subsidiaries of the Bank also appropriate their profit to a legal reserve which is added to the Bank's legal reserve.

In accordance with the Articles of Association of the bank, 10% of the Bank's net profit for the year is transferred to a voluntary reserve until such time as the balance in the reserve equals 20% of the issued share capital. This reserve is available for distribution. Additionally, the subsidiaries of the Bank also appropriate their profit to such reserves which are added to the Bank's voluntary reserve. The Bank maintains a general banking risk reserve to address the risks inherent in the Bank's operating environment. Contributions to this reserve are made at the discretion of the Directors. This reserve is available for distribution.

This reserve is available for distribution. The Bank has created a non-distributable special reserve titled as 'Regulatory Credit risk reserve' and this reserve is maintained at least at a level of 1.5% of the credit risk weighted assets at the end of each financial year, as instructed by the Central Bank of UAE. The Bank has also established a special reserve for credit risk. Contributions to this reserve are voluntary and made at the discretion of the Directors.

Treasury stock elimination amount represents the shares of the National Bank of Ras Al-Khaimah (P.S.C) owned by RAK National Insurance Company P.S.C.

#### 22 Provision for employees' end of service benefits

	2015 AED'000	2014 AED'000
At 1 January	84,852	73,312
Charge for the year	19,305	22,791
Amount acquired on RAKNIC acquisition	3,557	190
Payment during the year	(11,663)	(11,251)
At 31 December	96,051	84,852

In accordance with the provisions of IAS 19, management has carried out an exercise to assess the present value of its obligations as at 31 December 2015, using the projected unit credit method, in respect of employees' end of service benefits payable under the UAE Labour Law. The expected liability at the date of leaving the service has been discounted to net present value using a discount rate of 4.16% (2014: 4.27%). Under this method an assessment has been made of an employee's expected service life with the Group and the expected basic salary at the date of leaving the service. Management has assumed average annual increment/promotion costs of 3.5 % (2014: 3.5%).

#### 23 Contingencies and commitments

	2015	2014
	AED'000	AED'000
Irrevocable commitments to extend credit	37,646	36,069
Guarantees	723,420	678,812
Letters of credit	76,847	78,868
Acceptances	34,319	50,863
Capital commitments	19,018	10,182
	891,250	854,794

Letters of credit and acceptances are written undertakings by the Group on behalf of a customer authorising a third party to draw drafts on the Bank, up to a stipulated amount, under specific terms and conditions. These letters of credit and acceptancs are collateralised by the underlying shipments of goods to which they relate and therefore have significantly less risk.

Guarantees commit the Group to make payment on behalf of customers contingent upon the production of documents or failure of the customer to perform under the terms of the contract. Guarantees include AED 100 million guarantee given by the Bank for its subsidiary RAK Islamic Finance Company.

Cash requirements under guarantees and standby letters of credit are considerably less than the amount of the commitment because the Bank does not generally expect the third party to draw funds under the agreement.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

#### 23 Contingencies and commitments (continued)

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Bank is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss, though not easy to quantify, is considerably less than the total unused commitments since most commitments to extend credit are contingent upon customers maintaining specific credit standards. While there is some risk associated with the remainder of commitments, the risk is viewed as modest, since it results firstly from the possibility of the unused portion of loan authorisations being drawn by the customer, and second, from these drawings subsequently not being repaid as due. The Bank monitors the term to maturity of credit commitments because longer term commitments generally have a greater degree of risk than shorter term commitments. Commitments to extend credit amounting to AED 8,618 million (2014 AED 7,768 million) are revocable at the option of the Group and not included in the above table.

#### 24 Forward foreign exchange and interest rate swap contracts

Forward foreign exchange contracts comprise commitments to purchase foreign currencies on behalf of customers and in respect of the Group's undelivered spot transactions. Interest rate swap contracts comprise deals to convert fixed rate into a floating rate or vice versa.

Outstanding forward foreign exchange transactions at 31 December 2015 and 31 December 2014 are as follows:

	Contract amount AED'000	Fair value AED'000
31 December 2015.	745,446	235
31 December 2014	980,115	361

Outstanding interest rate swap transactions at 31 December 2015 and 31 December 2014 are as follows:

	Contract amount AED'000	Fair value AED'000
31 December 2015	2,850,248	22,625
31 December 2014	1,674,888	12,789

The fair values of the outstanding foreign exchange forward contracts are recorded in other assets for positive fair value and in other liabilities for negative fair value.

### Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

#### 32 Earnings per share

The basic earnings per share are calculated by dividing the net profit attributable to the shareholders of the Bank by the weighted average number of ordinary shares in issue during the period. In accordance with IAS 33 "Earnings Per Share", the impact of bonus shares issued has been considered retrospectively while computing the weighted average number of ordinary shares during all periods presented.

Net profit attributable to the shareholders for the year in	2015	2014
AED 000's	1,400,387	1,454,602
Weighted average number of shares in issue in 000's	1,676,245	1,676,245
Basic earnings per share in AED	0.84	0.87

There were no potentially dilutive shares as at 31 December 2015 and 2014.

#### 33 Dividends

At the meeting held on 2 February 2016, the Board of Directors proposed a cash dividend of 50 % amounting to AED 838.12 million of the issued and paid up capital in respect of the year ended 31 December 2015 (2014: 50% cash dividend amounting to AED 838.12 million).

Dividends are not accounted for until they have been approved at the Annual General Meeting and, accordingly, the proposed dividend will be accounted for as an appropriation of retained earnings of the year ended 31 December 2015 after it has been approved by the shareholders.

# Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

#### 34 Related party transactions and balances

Related parties comprise shareholders, key management, businesses controlled by shareholders and directors as well as businesses over which they exercise significant influence. During the year, the Group entered into significant transactions with related parties in the ordinary course of business and on normal commercial terms. The transactions and balances arising from these transactions are as follows:

	2015 AED'000	2014 AED'000

#### 36 Segment analysis

Following the management approach of IFRS 8, operating segments are reported in accordance with the internal reporting to the management, which is responsible for allocating resources to the reportable segments and assesses its performance. All operating segments used by the Group meet the definition of a reportable segment under IFRS 8.

The Group has four main business segments:

- Retail banking incorporating individual customer and small and medium entities current accounts, savings accounts, deposits, credit and debit cards, individual and small and medium entities' customer loans and mortgages;
- Wholesale banking incorporating transactions with corporate bodies including government and public bodies and comprising of loans, advances, deposits and trade finance transactions of customers and financial institutions; and
- Treasury incorporating activities of the dealing room, related money market, and foreign exchange transactions and hedging activities with other banks and financial institutions including the UAE Central Bank, none of which constitute a separately reportable segment.
- Insurance business incorporating all insurance related transactions of its subsidiary Ras Al Khaimah National Insurance Company PSC

The above segments include conventional and Islamic products and services of the Group.

As the Group's segment operations are all financial with a majority of revenues deriving from interest and fees and commission income, the management relies primarily on revenue and segmental results to assess the performance of the segment.

Funds are ordinarily allocated between segments, resulting in funding cost transfers disclosed in inter-segment revenue. Interest charged for these funds is based on the Bank's funds transfer pricing policy. There are no other material items of income or expense between the business segments.

The Group's management reporting is based on a measure of net profit comprising net interest income, loan impairment charges, net fee and commission income, other income and non-interest expenses.

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

#### 37 Fiduciary activities

The Group holds assets in a fiduciary capacity for its customers without recourse to itself. At 31 December 2015, such assets amounted to AED 1,786 million (2014: AED 1,775.5million) and are excluded from these consolidated financial statements of the Bank.

#### 38 Legal proceedings

The Bank is involved in various legal proceedings and claims arising in the ordinary course of business. While the outcome of these matters cannot be predicted with certainty, management does not believe that these matters will have a material adverse effect on the Bank's consolidated financial statements if settled unfavourably.

The Bank's subsidiary, RAKNIC in common with other insurance companies, is involved as defendant in a number of legal cases in respect of its underwriting activities. A provision is made in respect of each individual case where it is probable that the outcome would result in a loss to the Group in terms of an outflow of economic resources and a reliable estimate of the amount of outflow can be made.

#### 39 Reclassification

Previous year's numbers are reclassified and regrouped to conform to the current year classification.

#### 40 Business combination

On 28 May 2015 the Bank acquired a 79.23% stake in insurance provider Ras Al Khaimah National Insurance Company PSC (RAKNIC) operating in UAE through a public offer made to shareholders of RAKNIC. Management assessed the acquisition as a business combination under IFRS 3, 'Business Combinations'. As a result of the acquisition, the Bank further consolidated its position in the insurance market which was earlier through its Bancassurance window.

## Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

#### 40 Business combination (continued)

The following table summarises the consideration paid for acquisition and the fair value of identifiable assets acquired at the acquisition date:

		AED'000
Consideration		
Total cash consideration (a)		317,244
Recognised amounts of identifiable intangible assets acquired		
	Book value	Fair Value
Property and equipment	9,092	19,209
Investment securities	54,320	34,320
Cash and cash equivalents	113,288	113,288
Net receivables	56,914	7,384
Value of identifiable net assets on acquisition - (b)	233,614	174,201
Fair value of identifiable net assets acquired: (b x 79.23%) - (c) Intangibles:		138,023
Customer relationships		12,835
Total Intangibles (Note 10) - (d)		12,835
Goodwill including insurance license (Note 10): (a) -		
(c) -(d)		166,386
Cash consideration transferred		317,244
Cash & cash equivalents acquired		(113,288)
Net cash out flow on RAKNIC acquisition		203,956

The insurance business has reported an operating income of AED 39,235 thousand and net profit of AED 12,672 thousand since 28 May 2015. If the acquisition had occurred on 01 January 2015, the acquired operating income and net profit would have been estimated at AED 47.6 million and AED 23.1 million respectively.

In addition to the insurance license acquired, the goodwill acquired can be attributed to the well positioned business of RAKNIC which has an established franchise and reputation in UAE. RAKNIC has a sound management team and skilled workforce with strong sales and risk management skills. There are substantial synergies of the acquisition with the Bank which will be exploited in the future.

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

#### 41 Financial risk management

#### 41.1 Risk management review

The Group's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial services business. The Group's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Group's financial performance.

The Groups's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Group regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

#### 41.2 Credit risk

Credit risk is defined as the risk that the Group's customers, clients or counter parties fail to perform or are unwilling to pay interest, repay the principal or otherwise to fulfil their contractual obligations under loan agreements or other credit facilities, thus causing the Group to suffer a financial loss.

Credit risk also arises through the downgrading of counter parties, whose credit instruments are held by the Group, thereby resulting in the value of the assets to fall. As credit risk is the Group's most significant risk, considerable resources, expertise and controls are devoted to managing this risk within the core departments of the Bank.

The Group's credit policy provides for the development of a systematic and consistent approach to identifying and managing borrower and counter party risks contained in all retail and wholesale banking assets.

The divisional heads of retail and wholesale credit and their team including collections are responsible for recognition and management of credit risk both at transaction and portfolio levels and to ensure that risk procedures are adhered to in a manner consistent with the framework set out in the Credit Policy, Product Programs Guidelines, Credit circulars and comply with regulatory norms.

The Group manages, limits and controls concentration of credit risk wherever it is identified – in particular, to individual counterparties and groups, and to industries and countries. The Group has a Product Program Guide that sets limits of exposure and lending criteria. The Group also has credit limits that set out the lending and borrowing limits to/from other banks.

## Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

#### 41 Financial risk management (continued)

#### 41.2 Credit risk (continued)

The Group stratifies the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to geographical and industry segments. Such risks are monitored on an ongoing basis. Limits on the level of credit risk by product, industry sector and by country are approved by the Credit Committee and the Board of Directors.

The exposure to any one borrower, including banks, is further restricted by sub-limits covering on- and off-balance sheet exposures, and daily delivery risk limits in relation to trading items such as forward foreign exchange contracts. Actual exposures against limits are monitored on an ongoing basis.

The Group has in place policies which govern the determination of eligibility of various collaterals including credit protection, to be considered for credit risk mitigation which includes the minimum operational requirements that are required for the specific collateral to be considered as effective risk mitigants. The Group's major collaterals are mortgaged properties, investments, vehicles & other register-able assets.

The collateral is valued periodically ranging from quarterly to annually, depending on the type of collateral. Specifically for mortgaged property, a framework for valuation of mortgaged properties is established to ensure adequate policies and procedures are in place for efficient and proper conduct of valuation of mortgaged properties and other related activities in relation to the interpretation, monitoring and management of valuation of mortgaged properties.

### 41.2.1 Maximum exposure to credit risk before collateral held or other credit enhancements

	Maximum	exposure
•	2015	2014
	AED'000	AED'000
Credit risk exposures relating to on-balance sheet assets a	re as follows:	
Due from banks	1,906,813	305,947
Loans and advances:		
Loans to retail customers	25,400,580	24,276,616
Loans to wholesale banking customers	2,397,516	989,859
Insurance contract assets	254,655	-
Investment securities	4,114,981	3,785,289
Other assets	282,280	239,476
Credit risk exposures relating to off-balance sheet items as	re as follows:	
Loan commitments and other off balance sheet items	872,232	844,612
	35,229,057	30,441,799

## Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

- 41 Financial risk management (continued)
- 41.2 Credit risk (continued)
- 41.2.1 Maximum exposure to credit risk before collateral held or other credit enhancements (continued)

The above table represents a worst case scenario of credit risk exposure to the Group at 31 December 2015 and 2014 without taking account of any collateral held or other credit enhancements attached. For on-balance-sheet assets, the exposures set out above are based on net carrying amounts as reported in the consolidated statement of financial position.

As can be seen above, the most significant exposures arise from loans and advances to customers (including commitments) and amounts due from banks.

Management is confident in its ability to continue to control and minimise the loss arising from its exposure to credit risk resulting from its loans and advances portfolio, investment securities portfolio and amounts due from banks based on the following:

- 90% (2014: 93%) of the loans and advances are categorised in the top grades of the Bank's internal grading system.
- Mortgage loans, loan against investments, asset based finance and auto loans, which are backed by collateral together, represent a significant portion 31% (2014: 30 %) of loans and advances.
- 6.2 % (2014: 7.2%) of the loans comprise of restructured loans, where the Group has aligned its lending rates to current prevailing market lending rates and extended or modified payment arrangements to manage credit risk.
- The Bank continuously reviews its credit and credit underwriting policies and changes are made based on the Management Information System (MIS) reports and the patterns that emerge from these reports.
- A significant portion of investment securities comprise debt instruments that are issued by government, reputable quasi-government organisations and financial institutions.

#### 41 Financial risk management (continued)

#### 41.2 Credit risk (continued)

#### 41.2.2 Loans and advances to customers and amounts due from banks

Loans and advances to customers and amounts due from banks are summarised as follows:

	31 Decemb	<u>per 2015</u>	31 Decem	ber 2014
	Loans and advances	Amounts due	Loans and advances	Amounts
	to	from	to	due from
	customers	banks	customers	banks
	AED'000	AED'000	AED'000	AED'000
Neither past due nor				
impaired	25,683,132	1,906,813	24,050,663	305,947
Past due but not impaired	1,945,196	₩.	1,136,277	_
Individually impaired	914,368	_	618,762	-
Gross	28,542,696	1,906,813	25,805,702	305,947
Less: allowance for				
impairment	(744,600)	-	(539,227)	_
Net	27,798,096	1,906,813	25,266,475	305,947

#### Neither past due nor impaired

	31 Decen	aber 2015	31 Decem	nber 2014
	Loans and advances to customers AED'000	Amounts due from banks AED'000	Loans and advances to customers AED'000	Amounts due from banks AED'000
Loans and advances - Retail loans - Wholesale Banking	23,429,804	£	23,070,028	-
loans Due from banks Gross	2,253,328	1,906,813 1,906,813	980,635 24,050,663	305,947 305,947

#### Loans and advances

The Group uses the grading of loans into different buckets in assessing the impairment loss in the Group's loan portfolio. The credit quality of the portfolio of loans and advances that were neither past due nor impaired can be assessed by reference to the internal rating system adopted by the Group.

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

#### 41 Financial risk management (continued)

#### 41.2 Credit risk (continued)

#### 41.2.2 Loans and advances to customers and amounts due from banks (continued)

Retail banking loans are graded into buckets according to the number of installments past due. All loans that are not in default of interest payment and installment are graded as bucket 0, while loans and advances that are in default of interest payment and installments are graded upwards from bucket 1 onwards, depending on the number of days past due. The wholesale banking credit matrix is used to rate Wholesale Banking loans under various characteristics. There are nine categories of performing loans and one category of non-performing loans. These ratings are reviewed at least once a year, or more frequently as required. Loans and advances are classified as delinquent after 90 days of non-payment of interest and installments. The credit policy has set internal lending limits for various industry exposures. The wholesale banking loan portfolio is reviewed on a quarterly basis.

#### Amounts due from banks

The Group held amounts due from banks of AED 1,907 million (2014: 306 million) which represents its maximum credit exposure on these assets. The balance due from banks includes AED 999.5 million (2014: AED 73.5 million) placements with banks and banker's acceptances of AED 408.6 million (2014: Nil). Remaining balances due from banks and other financial institutions are held with reputable organisations within and outside UAE, where the risk of default is considered low.

#### Past due but not impaired

Loans and advances less than 90 days past due are not considered impaired in a collective assessment. Gross amount of loans and advances by class of customers that were past due but not impaired are as follows:

	31	December 2	015	31 1	December 20	14
		Wholesale			Wholesale	
	Retail	Banking		Retail	<b>Banking</b>	
	loans	loans	Total	loans	loans	Total
	AED'000	AED'000	AED'000	AED'000	AED'000	AED'000
Past due up to 30 day	1,067,084	62,905	1,129,989	697,801	1,316	699,117
Past due 30 to 60						
days	450,914	29,907	480,821	272,203	508	272,711
Past due more than						
60 days	330,346	4,040	334,386	164,449		164,449
Total	1,848,344	96,852	1,945,196	1,134,453	1,824	1,136,277

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

#### 41 Financial risk management (continued)

#### 41.2 Credit risk (continued)

#### 41.2.2 Loans and advances to customers and amounts due from banks (continued)

#### Individually Impaired

The breakdown of the gross amount of individually impaired loans and advances, Islamic financing assets along with the fair value of related collateral held by the bank as security, are as follows:

	31	December 2	015	31 December 2014		
		Wholesale			Wholesale	
	Retail	Banking		Retail	Banking	
	loans	' loans	Total	loans	loans	Total
	AED'000	AED'000	AED'000	AED'000	AED'000	AED'000
Individually impaired loans Fair value of	835,134	79,234	914,368	580,976	37,786	618,762
collateral	(268,037)		(268,037)	(220,415)	(9,570)	(229,985)
Net	567,097	79,234	646,331	360,561	28,216	388,777

The total impairment provision for loans and advances is AED 744.6 million (2014: AED 539.2 million) of which AED 657.9 million (2014: AED 436.2 million) represents provision in respect of the individually impaired loans and advances and the remaining AED 86.7 million (2014: AED 103.0 million) represents the portfolio provision to reflect the risk inherent in the Group's loan portfolio. AED 268.0 million fair value of collateral shown above under retail loans represents AED 259.7 million fair value of collateral against mortgage loans and AED 8.3 million against small and medium business loans.

#### 41 Financial risk management (continued)

#### 41.2 Credit risk (continued)

#### 41.2.2 Loans and advances to customers and amounts due from banks (continued)

#### Restructured loans and advances

Restructuring activities include interest rate adjustments, extended payment arrangements and modification of payments. The majority of restructuring activity is undertaken to improve cash flow and is within the terms and conditions of the Group's product programme guideline. These policies are kept under continuous review. The Group has reviewed the entire portfolio has reported only restructured loan with financial difficulties under this note. The table below presents loans restructured during the year 2015 and 2014.

Loans restructured during the year

•	20	15	2014		
Product	No of Accounts	Loan Amount AED'000	No of Accounts	Loan Amount AED'000	
Personal loans to nationals and

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

#### 41 Financial risk management (continued)

#### 41.2 Credit risk (continued

#### 41.2.3 Investment securities

Investment securities comprise debt securities issued by the Government, organisations which are quasi-governmental and local and foreign reputable organisations.

The table below presents an analysis of debt securities by rating agency designation at 31 December 2015 and 2014, based on Moody's and Fitch ratings or their equivalent.

	2015 AED'000	2014 AED'000
AA to A-	1,109,814	1,058,102
BBB+ to BBB-	1,840,778	1,798,246
Unrated	1,118,623	910,580
Total	4,069,215	3,766,928

The unrated securities include bonds/ Sukuks of Dubai Department of Finance amounting to AED 702.1million (2014 AED 705.7 million), Emirates Airlines amounting to AED 192.4 million (2014 204.9 million), Credit linked notes amounting to AED 220.4 million (2014: Nil) and Nakheel (Dubai government related entity) Sukuk amounting to 3.7million (2014: Nil). The management is comfortable with the above unrated instruments.

#### 41.2.4 Repossessed collateral

The Group occasionally takes possession of mortgaged property which is held as collateral for loans. During the year, the Group took possession of a property with market value of AED 5.4 million mortgaged by a wholesale banking customer. The acquired property is reported under other assets of the Group's balance sheet.

In the case of retail auto loans and wholesale banking asset based finance where the underlying asset is repossessed as a part of recovery process, these are disposed of in an auction by authorised third parties and the Bank does not carry any such assets in its books.

#### 41.2.5 Concentration of risks of financial assets with credit risk exposure

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Bank's performance to developments affecting a particular industry or geographical location.

In order to avoid excessive concentrations of risk, the Group's policies and procedures include specific guidelines to limit concentrations of exposures to counterparties, geographies and industries. Identified concentration of credit risk is controlled and managed accordingly.

### Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 41 Financial risk management (continued)

### 41.2.8 Offsetting financial instruments

The Group has not entered in significant master netting arrangement with counterparties which enable settlement of transactions on a net basis. In absence of such agreements the financial asset and liabilities are settled on gross basis.

### 41.3 Market risk

The Group takes on exposure to market risk, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions in interest rate, currency and equity instruments, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads, foreign exchange rates and equity prices.

The Asset and Liability Committee (ALCO) is chaired by the Chief Executive Officer and comprises the Divisional heads of Finance, Treasury, Risk, Operations, Wholesale Banking and Retail Banking. It meets on a regular basis to monitor and manage market risk.

ALCO is responsible for formalising the Group's key financial indicators and ratios, sets the thresholds to manage and monitor the market risk and also analyses the sensitivity of the Group's interest rate and maturity mis-matches. ALCO also guides the Group's investment decisions and provides guidance in terms of interest rate and currency movements.

Further the Group does not enter into derivative trades for speculative purposes. The only exposure to derivatives is in respect of forward exchange contracts which are entered to meet customer needs or interest rate swaps for economic hedging purposes.

### 41.3.1 Price risk

The Group is exposed to price risk as a result of its holdings in debt securities classified as available-for-sale investment securities. The fair values of investments quoted in active markets are based on current bid prices Senior management meets regularly to discuss the return on investment and concentration across the Group's investment portfolio.

The sensitivity analysis for price risk illustrates how changes in the fair value of securities held by the Group will fluctuate because of changes to market prices whether those changes are caused by factors specific to the individual issuer, or factors affecting all similar securities traded in the market.

### Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 41 Financial risk management (continued)

### 41.3.2 Interest rate risk

Cash flow interest risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Interest margins may increase as a result of such changes but may reduce losses in the event that unexpected movements arise. The Group monitors interest rate risk through the use of a detailed gap report and stress tests to analyse the impact of anticipated movements in interest rates.

Financial assets that are not subject to any interest-rate risk mainly comprise investments in equity investments, cash, balances with central banks excluding certificates of deposit and property and equipment and other assets.

The Group uses financial simulation tools to periodically measure and monitor interest-rate sensitivity.

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 41 Financial risk management (continued)

### 41.3 Market risk (continued)

### 41.3.2 Interest rate risk (continued)

Interest rate risk is assessed by measuring the impact of reasonable possible change in interest rate movements. The Group assumes a fluctuation in interest rates of 25 basis points (bps) and estimates the following impact on the net profit for the year and net assets at that date:

	2015 AED'000	2014 AED'000
Fluctuation in interest rates by 25 bps	26,325	18,309

The interest rate sensitivities set out above are worst case scenarios and employ simplified calculations. They are based on the gap between AED 13,483 million (2014: AED 13,527 million) of interest bearing assets with maturities within one year and AED 22,869 million (2014: AED 20,374 million) of interest bearing liabilities with maturities within one year. The sensitivity does not incorporate actions that could be taken by management to mitigate the effect of interest rate movements.

### 41.3.3 Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates and arises from financial instruments denominated in a foreign currency. Positions are closely monitored and strategies are used to ensure positions are maintained within established limits.

The Group's assets are typically funded in the same currency as that of the business transacted in order to eliminate foreign exchange exposure. However, the Group does maintain a US dollar open position within limits approved by the Bank's ALCO.

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 41 Financial risk management (continued)

### 41.3 Market risk (continued)

### 41.3.3 Currency risk (continued)

At 31 December 2015, the Bank had the following net exposures denominated in foreign currencies:

### 41 Financial risk management (continued)

### 41.4 Liquidity risk

Liquidity risk is the risk that the Group is unable to meet its obligations when they fall due as a result of customer deposits being withdrawn, cash requirements from contractual commitments, or other cash outflows, such as debt maturities. Such outflows would deplete available cash resources for customer lending, trading activities and investments. In extreme circumstances, lack of liquidity could result in reductions in the balance sheet and sales of assets, or potentially an inability to fulfil lending commitments. The risk that the Group will be unable to do so is inherent in all banking operations and can be affected by a range of institution-specific and market-wide events including, but not limited to, credit events, systemic shocks and natural disasters.

### 41.4.1 Liquidity risk management process

The Group manages its liquidity in accordance with Central Bank of the U.A.E. requirements and the Group's internal guidelines mandated by ALCO. Based on the directives of the ALCO, the Treasury manages the liquidity of the Bank.

On the funding side, the Group has a large proportion of its funds in the form of own funds which reduces the requirement for external funds. The Group relies on deposits from its relationship based retail and Wholesale banking customers as its primary source of funding and only on a short term basis relies on interbank borrowings to fund its assets. The Group's debt securities typically are issued with maturities of greater than three years. Deposits from customers generally have shorter maturities and a large portion of them are repayable on demand as is endemic to these markets. The short term nature of these deposits increases the Group's liquidity risk and the bank manages this risk through maintaining competitive pricing and constant monitoring of market trends. Also, a most of the deposit customers of the Group are relationship based and based on past trends these deposits that they maintain are sticky in nature, thus reducing the liquidity risk to a large extent. The Group does not rely on large ticket deposits and its depositor profile is very diverse leading to a more stable deposit funding. The Group raised USD 500 million under Euro Medium Term Notes under USD 1 billion EMTN programme launched in June 2014. In March 2015 a second tranche of USD 300 million notes were issued under this programme. This helped the Group achieve long term funding. The Group may raise further amounts through EMTNs.

On the deployment side, the Group maintains a portfolio of highly liquid assets largely made up of balances with the UAE Central Bank, certificates of deposits issued by the Central Bank, inter-bank facilities and investment securities including investments in local government bonds which can be repoed to meet short term liquidity mismatches and be offloaded to meet longer term mismatches. The Central Bank of the U.A.E. has prescribed reserve requirements on deposits ranging between 1% and 14% on time and demand deposits. As a contingency funding plan, the Group evaluates and keeps ready debt financing plans which can be quickly executed if required.

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

- 41 Financial risk management (continued)
- 41.4 Liquidity risk (continued)

### 41.4.1 Liquidity risk management process (continued)

The table below analyses assets and liabilities of the Group into relevant maturity groupings based on the remaining years from the reporting date to the contractual cash flow date. The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature, are important factors in assessing the liquidity of the Group and its exposure to changes in interest rates and exchange rates.

The Central Bank of the U.A.E. also imposes mandatory 1:1 loans to stable resources ratio (LSRR) whereby loans and advances (combined with inter-bank placements having a remaining term of greater than three months) should not exceed stable funds as defined by the Central Bank of the U.A.E. ALCO monitors loans to stable resources ratios on a daily basis. The Group on a daily basis also monitors the liquid assets to total assets ratio and the eligible Liquid Asset Ratio and has set up internal Management Action Triggers to take suitable corrective actions once the internal thresholds have been reached.

At 31 December 2015, 24.9% (2014: 21.7%) of the Group's total assets was in liquid assets. The LSRR as at 31 December, 2015 stood at 83.3 % (2014: 87.9 %) which is significantly lower than the maximum requirement of 100%. Similarly the Liquid Assets Ratio of the Group stood at 19.1% (2014: 20.0%) as at 31 December 2015, also reflecting a healthy liquidity position.

### 41 Financial risk management (continued)

### 41.4 Liquidity risk (continued)

### 41.4.1 Liquidity risk management process (continued)

The Group has a large proportion of its liabilities as demand deposits which do not have a fixed maturity. Although behaviourally these deposits are stable, these have been grouped under up to 3 months category in accordance with the UAE Central Bank guideline.

### 41.4.2 Derivative cash flows

The Group's derivatives that will be settled on a gross basis comprise foreign exchange contracts.

The table below analyses the Group's derivative financial instruments that will be settled on a gross basis into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows related to foreign exchange contract. Cash flows from interest rate swap not included in below note.

Since the interest swap does not have any significant impact on liquidity they have not been considered in the below table:

	Up to 1 month AED'000	1 -3 months AED'000	3 -12 months AED'000	1-5 years AED'000	Over 5 years AED'000	Total AED'000
At 31 December 2015 Foreign exchange contracts						
- Outflow	468,747	55,742	220,957	-	3	745,446
- Inflow	468,747	55,742	220,957			745,446
At 31 December 2014 Foreign exchange contracts:						
- Outflow	892,663	87,452	*	_		980,115
- Inflow	892,663	87,452				980,115

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 41 Financial risk management (continued)

### 41.4 Liquidity risk (continued)

### 41.4.3 Off-balance sheet items

	No later than 1 year AED'000	1-5 years AED'000	Over 5 years AED'000	Total AED'000

### 41 Financial risk management (continued)

### 41.5 Fair values of financial assets and liabilities

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between the carrying values and fair value estimates of financial assets and liabilities. At 31 December 2015, the carrying value of the Group's financial assets and liabilities measured at amortised cost approximate their fair values, except for the below mentioned financial asset:

	Fair v	alue	Carrying value	
	2015 AED'000	2014 AED'000	2015 AED'000	2014 AED'000
Financial assets Investment securities	4,193,318	3,916,880	4,114,981	3,785,289

### **Investment securities**

Investment securities comprise mainly of interest-bearing debt instruments that are held-to-maturity or instruments is based on quoted market prices. Investment in equity shares is based on quoted prices.

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

## Financial risk management (continued)

### 41.6 Financial instruments

### Categories of financial instruments

The following tables analyse the Group's financial assets and financial liabilities in accordance with categories of financial instruments under IAS 39.

### 41 Financial risk management (continued)

### 41.7 Fair value hierarchy

The fair value measurements are categorised into different levels in the fair value hierarchy based on the inputs to valuation techniques used. The different levels are defined as follows:

### Quoted market prices - Level 1

Financial instruments are classified as Level 1 if their values are observable in an active market. Such instruments are valued by reference to unadjusted quoted prices for identical assets or liabilities in active markets where the quoted price is readily available, and the price represents actual and regularly occurring market transactions.

### Valuation techniques using observable inputs - Level 2

Financial instruments classified as Level 2 have been valued using models whose inputs are observable in an active market. Valuation based on observable inputs include financial instruments such as forwards foreign exchange contracts which are valued using market standard pricing techniques.

### Valuation techniques using significant unobservable inputs – Level 3

Financial instruments are classified as Level 3 if their valuation incorporates significant inputs that are not based on observable market data (unobservable inputs). A valuation input is considered observable if it can be directly observed from a transaction in an active market.

Unobservable input levels are generally determined based on observable inputs of a similar nature, historical observations or other analytical techniques.

This hierarchy requires the use of observable market data when available. The Bank considers relevant and observable market prices in its valuations where possible. The table below analyses recurring fair value measurements for assets and liabilities.

### Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 41 Financial risk management (continued)

### 41.7 Fair value hierarchy (continued)

The assets measured at fair value as per the hierarchy are disclosed in the table below:

31 December 2015	Quoted market prices Level 1 AED '000	Observable inputs Level 2 AED '000	Significant unobservable inputs Level 3 AED '000	Total AED'000

### 41 Financial risk management (continued)

### 41.8 Fair values of financial assets and liabilities

Fair value is the amount for which an asset could be exchanged or a liability settled between knowledgeable, willing parties in an arm's length transaction. Consequently, differences can arise between the carrying values and fair value estimates of financial assets and liabilities. At 30 September 2015, the carrying value of the Group's financial assets and liabilities approximate their fair values, except for the below mentioned financial assets and liabilities:

	Fair value		Carrying value	
	31 December 2015	31 December 2014	31 December 2015	31 December 2014
	AED'000	AED'000	AED'000	AED'000

### Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 41 Financial risk management (continued)

### 41.9 Capital Management

The Bank's objectives when managing capital, which is a broader concept than the 'equity' on the face of statement of financial position, are:

- to comply with the capital requirements set by the Central Bank of United Arab Emirates;
- to safeguard the Bank's ability to continue as a going concern and increase the returns for the shareholders; and
- to maintain a strong capital base to support the development of its business.

Capital adequacy and the use of regulatory capital are monitored on a regular basis by the Bank's management, employing techniques based on the guidelines developed by the Basel Committee and the Central Bank of United Arab Emirates. The required information is filed with the regulators on a regular basis as required under Basel II standards.

The Bank's capital management is driven by short- and long-term strategies and organisational requirements with due consideration to the regulatory, economic and commercial environment in which the Bank operates.

The Bank seeks to optimise returns on capital, and its objective has always been to maintain a strong capital base to support business development and to meet regulatory capital requirements at all times.

### 41.9.1 Capital structure and capital adequacy as per Basel II requirement as at 31 December 2015

The Bank is required to report capital resources and risk-weighted assets under the Basel II Pillar 1 framework, as shown in the following table. The Bank has adopted standardised approach for calculation of credit risk and market risk capital charge. On operational risk, alternative standardized approach is followed for capital charge calculation under Pillar1.

### 42 Insurance risk

The Group accepts insurance risk through its written insurance contracts. The Group is exposed to uncertainty surrounding the timing, frequency and severity of claims under these contracts.

The principal risk the Group faces under insurance contracts is that the actual claims and benefit payments or the timing thereof, differ from expectations. This is influenced by the frequency of claims, severity of claims, actual benefits paid and subsequent development of long-term claims. Therefore, the objective of the Group is to ensure that sufficient reserves are available to cover these liabilities.

The above risk exposure is mitigated by diversification across a large portfolio of insurance contracts. The variability of risks is also improved by careful selection and implementation of underwriting strategy guidelines, as well as the use of reinsurance arrangements. The Group mainly issues short term insurance contracts in connection with property, motor, marine and casualty risks.

Two key elements of the Group's insurance risk management framework are its underwriting strategy and reinsurance strategy, as discussed below.

### Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 42 Insurance risk (continued)

### Underwriting strategy

The Group's underwriting strategy is to build balanced portfolios based on a large number of similar risks. This reduces the variability of the portfolios outcome.

The underwriting strategy is set out by the Group that establishes the classes of business to be written, the territories in which business is to be written and the industry sectors in which the Group is prepared to underwrite. This strategy is cascaded by the business units to individual underwriters through detailed underwriting authorities that set out the limits that any one underwriter can write by line size, class of business, territory and industry in order to ensure appropriate risk selection within the portfolio. All general insurance contracts except marine, are annual in nature and the underwriters have the right to refuse renewal or to change the terms and conditions of the contract at renewal.

### Frequency and amounts of claims

The Group has developed their underwriting strategy to diversify the type of insurance risks accepted and within each of the categories to achieve sufficiently large populations of risk to reduce the variability of the expected outcome. The frequency and amounts of claims can be affected by several factors. The Group underwrites mainly property, motor, casualty, medical and marine risks. These are regarded as short-term insurance contracts as claims are normally advised and settled within one year of the insured event taking place.

### Property

Property insurance covers a diverse collection of risks and therefore property insurance contracts are subdivided into four risks groups, fire, business interruption, weather damage and theft. These contracts are underwritten by reference to the commercial replacement value of the properties and contents insured. The cost of rebuilding properties, of replacement or indemnity for contents and time taken to restart operations for business interruptions are the key factors that influence the level of claims under these policies. The greatest likelihood of significant losses on these contracts arises from storm, flood damage or other weather related incidents.

### Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 42 Insurance risk (continued)

### Motor

Motor insurance contracts are designed to compensate policies holders for damage suffered to vehicles, disability to third parties arising through accidents and fire or theft of their vehicles.

Underwriting limits and guidelines are in place to enforce appropriate risk selection criteria.

The level of court awards for deaths and to injured parties and the replacement costs of motor vehicles are the key factors that influence the level of claims

### Marine

Marine insurance is designed to compensate contract holders for damage and liability arising through loss or damage to marine craft and accidents at sea resulting in the total or partial loss of cargoes.

For marine insurance, the main risks are loss or damage to marine craft and accidents resulting in the total or partial loss of cargoes.

The underwriting strategy for the marine class of business is to ensure that policies are well diversified in terms of vessels and shipping routes covered.

### Casualty

For casualty class of business, such as workmen's compensation, personal accident, general third party liability and loss of money, the extent of loss or damage and the potential court awards are the main factors that influence the level of claims.

The Company manage these risks through their underwriting strategy, adequate reinsurance arrangements and proactive claims handling. The underwriting strategy attempts to ensure that the underwritten risks are well diversified in terms of type and amount of risk. Underwriting limits are in place to enforce appropriate risk selections.

The Company proactively manage and pursue early settlement of claims to reduce their exposure to unpredictable developments.

The Company has adequate reinsurance arrangements to protect their financial viability against such claims for all classes of business

The Company has obtained adequate non-proportionate reinsurance cover for all classes of an amount considered appropriate by the management.

### Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 42 Insurance risk (continued)

### Medical

Medical selection is part of the Group's underwriting procedures, whereby contributions are charged to reflect the health condition and family medical history of the applicants. Pricing is based on assumptions, such as mortality and persistency, which consider past experience and current trends. Contracts including specific risks and guarantees are tested for profitability according to predefined procedures before approval.

Products are reviewed by the business units on an annual basis to confirm, or otherwise, that pricing assumptions remain appropriate. Analysis is performed on earnings and liability movements to understand the source of any material variation in actual results from what was expected. This confirms the appropriateness of assumptions used in underwriting and pricing.

### Concentration of insurance risk

The insurance risk arising from insurance contracts is concentrated mainly in the United Arab Emirates. The geographical risk profile is similar to last year.

### Assumptions and sensitivities

Process used to determine the assumptions

The method used by the Group for provision of IBNR takes into account historical data, past estimates and details of the reinsurance programme, to assess the expected size of reinsurance recoveries.

The assumptions that have the greatest effect on the measurement of insurance contract provisions are the expected loss ratios for the most recent accident years.

### Reinsurance strategy

The Group reinsures a portion of the insurance risks it underwrites in order to control its exposure to losses and protect capital resources.

Ceded reinsurance contains credit risk, as discussed in the financial risk management note. The Group has a Reinsurance department that is responsible for setting the minimum security criteria for acceptable reinsurance and monitoring the purchase of reinsurance by the business units against those criteria. The department monitors developments in the reinsurance programme and its ongoing adequacy.

### Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 42 Insurance risk (continued)

Reinsurance strategy (continued)

The Group buys a combination of proportionate and non-proportionate reinsurance treaties to reduce the net exposure to the Group. In addition, underwriters are allowed to buy facultative reinsurance in certain specified circumstances. All purchases of facultative reinsurance are subject to business unit pre-approval and the total expenditure on facultative reinsurance is monitored regularly by reinsurance department.

### 43 Critical accounting estimates and judgements in applying accounting policies

The Group's consolidated financial statements and its financial results are influenced by accounting policies, assumptions, estimates and management judgement, which necessarily have to be made in the course of preparation of the consolidated financial statements. The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. All estimates and assumptions required in conformity with IFRS are best estimates undertaken in accordance with applicable standards. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Accounting policies and management judgement for certain items are especially critical for the Group's results and financial situation due to their materiality.

### (a) Impairment losses on loans and advances and insurance receivables.

The Group reviews its loan portfolio and receivables to assess impairment at least on a quarterly basis. In determining whether an impairment loss should be recorded in the income statement, the Group makes judgements as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of loans or receivables before the decrease can be identified with an individual loan or receivables in that portfolio. This evidence may include observable data indicating that there has been an adverse change in the payment status of borrowers in a group, or national or local economic conditions that correlate with defaults on assets in the group. Management takes into account the historical loss experience in estimating future cash flows in assessing the loan portfolio and receivables for impairment. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience. A +/-5% change in the provision would increase/decrease the profit by AED 37 million (2014: AED 27 million).

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 43 Critical accounting estimates and judgements in applying accounting policies (continued)

### (b) Held-to-maturity investments

The Group follows the guidance of IAS 39 on classifying non-derivative financial assets with fixed or determinable payments and fixed maturity as held-to-maturity. This classification requires judgement. In making this judgement, the Group evaluates its intention and ability to hold such investments to maturity. If the Group fails to hold these investments to maturity other than in specific circumstances – for example, selling an insignificant amount close to maturity or for exceptional credit related reasons – it will be required to reclassify the entire class as available-for-sale. The investments would therefore be measured at fair value not amortised cost.

### (c) Impairment of available for sale investments

The Group treats available-for-sale investments as impaired when there has been a significant or prolonged decline in the fair value below its cost or where other objective evidence of impairment exists. The determination of what is "significant" or "prolonged" requires considerable judgment.

### (d) Provision for outstanding claims, whether reported or not

Considerable judgment by the management is required in the estimation of amounts due to the contract holders arising from claims made under insurance contracts. Such estimates are necessarily based on significant assumptions about several factors involving varying, and possible significant, degrees of judgment and uncertainty and actual results may differ from management's estimates resulting in future changes in estimated liabilities.

In particular, estimates have to be made both for the expected ultimate cost of claims reported at the date of statement of financial position and for the expected ultimate cost of claims incurred but not reported ("IBNR") at the date of statement of financial position.

Claims requiring court or arbitration decisions are estimated individually. Independent loss adjusters normally estimate property claims. Management reviews its provisions for claims incurred and IBNR claims regularly.

### (e) Useful lives of property and equipment

The management determines the useful lives of property and equipment and the related depreciation charge. The depreciation charge for the year will change significantly if the actual life is different from the estimated useful life of the asset.

The review carried out by management in the current year did not indicate any necessity for changes in the useful lives of property and equipment

Notes to the consolidated financial statements for the year ended 31 December 2015 (continued)

### 44 Social contributions

The social contributions made (including donations and charity) during the year to various beneficiaries amounted to AED 1.63 million (AED 1.62 million).
