

Templeton Shariah Global Equity Fund

Class A (acc) USD • ISIN LU0792757196 • A sub-fund of Franklin Templeton Shariah Funds
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

The primary characteristic of a Shariah fund is its compliance with Shariah guidelines based on the principles of Islamic finance. A Shariah fund is required to appoint a Shariah supervisory board which independently ensures that the fund also meets such Shariah guidelines in the management of all of its assets.

Templeton Shariah Global Equity Fund (the "Fund") aims to increase the value of its investments from Shariah-compliant securities over the medium to long term.

The Fund pursues an actively managed investment strategy and invests mainly in:

- equity and equity-related securities issued by companies of any size located in any country, including emerging markets
- certificates issued typically by a bank or a trust company that give their holders the right to receive securities issued by a foreign or domestic company (Depositary Receipts)

The Fund can invest to a lesser extent in:

- Shariah-compliant debt securities, including Sukuk and Shariah-compliant short-term instruments, issued by governments and companies of any size located in any country (limited to 25% of assets)

The investment team uses in-depth analysis to select individual equity securities that it believes are undervalued, based on such factors as their

expected long-term earnings and the value of their business assets.

The benchmark of the Fund is the MSCI AC World Islamic Index-NR. The benchmark is used solely as a reference for Investors to compare against the Fund's performance, and the benchmark is neither used as a constraint on how the Fund's portfolio is to be constructed nor set as a target for the Fund's performance to beat. The Fund can deviate from the benchmark.

You may request the sale of your shares on any Luxembourg business day.

The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section "Fund Information Objectives and Investment Policies" of the current prospectus of Franklin Templeton Shariah Funds.

Terms to Understand

Equity securities: Securities that represent an ownership stake in a company.

Emerging markets: Countries whose economy, stock market, political situation and regulatory framework are not fully developed.

Shariah-compliant debt securities: Financial securities that comply with Shariah, such as Sukuk, where the holder owns an undivided exposure over an underlying asset, or Murabaha, where a party buys an asset and agrees upon a sale price with a prospective buyer for an agreed upon profit.

Sukuk: Islamic financial securities similar to bonds that comply with Shariah and where the holder owns an undivided exposure over an underlying asset

Short-term instruments: Shariah-compliant securities with defined terms and a short maturity where, for example, a party buys an asset and then agrees upon a sale price with a prospective buyer for an agreed upon profit.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in Shariah-compliant equity and equity-related securities of companies around the world. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the Fund

can fluctuate significantly over relatively short time periods.

Risks materially relevant not adequately captured by the indicator:

Emerging markets risk: the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.

Shariah compliance risk: the risk that the restriction to invest only in Shariah-compliant securities may place the Fund at a comparative disadvantage vs. funds that do not have this restriction. Returns to shareholders may also be reduced due to payments to Shariah approved charities to "purify" dividends.

For a full description of all the risks applicable to this Fund, please refer to the section "Risk Considerations" of the current prospectus of Franklin Templeton Shariah Funds.
