

Goldman Sachs US Real Estate Balanced Portfolio (the “Portfolio”)

Base Shares (MDist)

(ISIN: LU0889235379)

a sub-fund of Goldman Sachs Funds (the “Fund”)

The Portfolio is managed by Goldman Sachs Asset Management Global Services Limited (the “Manager”), part of Goldman Sachs group of companies.

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and Investment Policy

- The Portfolio seeks to provide income and capital growth over the longer term.
- The Portfolio aims to provide exposure to US real estate markets and will mostly hold:
 - Shares or similar instruments relating to US companies,
 - Fixed income securities (mostly below investment grade) of US companies (including those securities issued by issuing entities based in offshore centres from where corporate fixed income securities may be issued),
 - US mortgage backed securities (mostly below investment grade).
- The Portfolio may invest in convertible (securities that can be converted into other type of securities). These convertibles may include contingent convertible bonds (“CoCos”) of banks, finance and insurance companies which have a particular risk profile as set out below.
- The Portfolio may invest in excess of 20% of its net assets in mortgage and asset-backed securities.
- The Portfolio uses derivatives as part of its investment policy to gain exposure to, amongst other things, shares or similar instruments and markets, interest rates, credit, currencies and/or commodities in order to seek to increase return, to leverage the Portfolio and to hedge against certain risks. A significant proportion of the Portfolio's exposure may be generated through the use of derivatives. A derivative instrument is a

contract between two or more parties whose value depends on the rise and fall of the underlying asset.

- Shares in the Portfolio may be redeemed daily on demand.
- Income (net of expenses) is distributed on a monthly basis.
- The Portfolio currency is USD. The share class currency is USD.
- **For full investment objective and policy details see the Prospectus.**

Risk and Reward Profile

This risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Portfolio. The risk category shown is not guaranteed and may change over time. The lowest category does not mean risk free. It is possible that a portfolio stated to have a lower risk profile may in fact fall in value more than a portfolio with a higher risk profile.

The Portfolio is in category 4 as it mostly invests in shares and similar instruments and below investment grade fixed income securities which typically experience higher levels of price fluctuation than other securities.

The capital is not guaranteed.

Other Material Risks:

- **Real estate risk** - the Portfolio primarily invests in a very specific sector of the economy which can be particularly exposed to a downturn in macro economic conditions or particular conditions affecting the property market.
- **Contingent Convertible (“Coco”) Bond Risk** - investment in this particular type of bond may result in material losses to the Portfolio based on certain trigger events. The existence of these trigger events creates a different type of risk from traditional bonds and may more likely result in a partial or total loss of value or alternatively they may be converted into shares of the issuing company which may also have suffered a loss in value.
- **Volatility risk** - an investment in the Portfolio can expose investors to higher volatility levels than is normally associated with “balanced” investment strategies, therefore the value of their investment may be subject to significant changes in the short term.
- **High yield risk** - high-yield instruments, meaning investments which pay a high amount of income generally involve greater credit risk and sensitivity to economic developments, giving rise to greater price movement than lower yielding instruments.
- **Market risk** - the value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
- **Operational risk** - material losses to the Portfolio may arise as a result of human error, system and/or process failures, inadequate procedures or controls.
- **Liquidity risk** - the Portfolio may not always find another party willing to

purchase an asset that the Portfolio wants to sell which could impact the Portfolio's ability to meet redemption requests on demand.

- **Exchange rate risk** - changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of the performance of such assets. If applicable, investment techniques used to attempt to reduce the risk of currency movements (hedging), may not be effective. Hedging also involves additional risks associated with derivatives.
- **Custodian risk** - insolvency, breaches of duty of care or misconduct of a custodian or sub-custodian responsible for the safekeeping of the Portfolio's assets can result in loss to the Portfolio.
- **Interest rate risk** - when interest rates rise, bond prices fall, reflecting the ability of investors to obtain a more attractive rate of interest on their money elsewhere. Bond prices are therefore subject to movements in interest rates which may move for a number of reasons, political as well as economic.
- **Credit risk** - the failure of a counterparty or an issuer of a financial asset held within the Portfolio to meet its payment obligations will have a negative impact on the Portfolio.
- **Derivatives risk** - derivative instruments are highly sensitive to changes in the value of the underlying asset that they are based on. Certain derivatives may result in losses greater than the amount originally invested.
- **Counterparty risk** - a party that the Portfolio transacts with may fail to meet its obligations which could cause losses.
- **Mortgage-backed securities (“MBS”) and asset-backed securities (“ABS”) risk** - the mortgages backing MBS and assets backing ABS may be repaid earlier than required, resulting in a lower return.
- **For more detailed information on the risks associated with an investment in the Portfolio, please refer to the section in the Prospectus entitled “Risk Considerations” and discuss with your professional advisers.**

Charges

The charges you pay are used to pay the cost of running the Portfolio, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	5.50%
Exit charge	none
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken over a year	
Ongoing charges	1.67%
Charges taken under certain specific conditions	
Performance fee	none

Where applicable, the entry and exit charges shown are maximum figures and in some cases you might pay less - please contact your professional advisers for more information.

The ongoing charges figure shown here is an estimate of the charges. This figure is usually based on the actual charges for the preceding year, however, effective from 1 January 2017, the operating expenses for this share class changed from a fixed rate to a variable rate with a cap. The estimated figure shown here takes that change into account and is a more accurate indication of future charges than a figure based on the preceding year's charges. The Fund's annual report for each financial year will include detail on the exact charges made. This figure excludes transaction costs (including taxes and brokerage commissions) and any borrowing costs, which are payable from the assets of the Portfolio and may impact returns on your investment, and performance fees (where applicable).

For more information about charges, please refer to the Fund's Prospectus, section entitled "Fees and Expenses" and the relevant supplement for the Portfolio.

Past Performance

The Portfolio was launched in October 2012. The share class was launched in February 2013.

Where applicable, past performance has been calculated in USD and is expressed as a percentage change of the Portfolio's Net Asset Value at each year end (net of all fees). Where past performance is not shown there is insufficient data to provide a useful indication of past performance.

Please be aware that past performance is not indicative of future performance which may vary.

Practical Information

Depositary: State Street Bank Luxembourg S.C.A.

Further Information: The Prospectus, annual and semi-annual reports and latest share price are available free of charge from the Fund's registered office, the Manager, administrator or the Portfolio's distributors. The Prospectus is available in English, French, German, Italian and Spanish.

This document is for a single Portfolio of the Fund and the Prospectus, annual and semi-annual reports is for the entire Fund.

The Fund is an investment company with segregated liability between portfolios under Luxembourg law. Therefore, the assets of the Portfolio you have invested in should not be used to pay the liabilities of other portfolios. However, this has not been tested in other jurisdictions.

Switching between Portfolios: Shares are available in other share classes and in other currencies as may be specified in the Prospectus. Shareholders may apply for their shares in any share class of any portfolio to be converted into any share class of another portfolio, subject to the conditions set out in the Prospectus (charges may apply).

Liability Statement: The Fund may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Prospectus for the Fund.

Tax Legislation: This Portfolio's investments may be subject to tax in the countries in which it invests. In addition, this Portfolio is subject to the tax law and regulation of Luxembourg which may have an impact on your personal tax position and impact your investment. For further details, please speak to your professional advisers.

Remuneration Policy: Details of the up-to-date remuneration policy of the Manager, including, but not limited to, a description of how the remuneration and benefits are determined and governed by the Manager, are available at http://www.goldmansachs.com/gsam/docs/funds_international/legal_documents/others/gsamgsl-comp-summary.pdf and a paper copy is made available free of charge upon request.
